Work Experience

Tata Consultancy Services   **Pune, India**
Full Stack Developer.   *Sept 2022 – Present*

  – Video Conferencing App (WebRTC + Node.js): Developed a real-time collaboration application with features like chat, screen sharing, server-based screen recording, and an interactive whiteboard; tested APIs using Postman and created a Selenium-based automated performance testing suite to simulate user interactions and assess scalability and reliability.

  – E-commerce Platform (Full Stack Developer): Built core modules including billing, subscription, product creation, licensing, and user authentication/registration using MVC architecture with HTML, CSS, JavaScript, jQuery, Spring Boot, Java, and SQL; enhanced SEO performance and implemented CI/CD pipelines with Jenkins to streamline deployments.

  – Testing Framework (London Stock Exchange Group): Currently developing and maintaining a Maven-based automated testing framework using Java, Cucumber, TestNG, Selenium, integrated with BrowserStack for cross-browser testing and GitLab for CI and version control, supporting platforms like learning and product management systems.
